## VIBRATION MOUNTS AVFBNA

**SKU:** AVFBNA

**ASEC Kunststoffen BV**

Marketing 17, 6921 RE Duiven, The Netherlands

T: +31 316 84 44 01 | info@asec.nl

**Categories:** Bushes

The AVFBNA range of bushes is designed to eliminate high frequencies whilst supporting high loads during operations. This is achieved through elastic deformation of the rubber under the effect of external forces being applied to the metal tubes, The bushes are manufactured with the rubber bonded both to the inner and outer tubes, and pre-loaded using a special process that assures a high resistance to the stresses involved during the operation.

Optional ordering with different elastomeric hardness and compounds. Optional ordering with smaller tolerances if required.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions. ASEC Products is not directly neither indirectly responsible for any claim resulting from the use of any information provided in this datasheet.
