Categories: Calsium silicate glass fibre

AIDuratecXP is a asbestos fibre free glass fibre reinforced calcium silicate large sized board. These boards are made in a density of 1800 kg/m3. Ideal suited for replacing asbestos containing materials in all industrial applications. The material is non-brittle and electrically inert.

Excellent machinability. Temperature range of 1000ºC and 1200ºC. High electrical and arc resistance. High termal and temperature resistance. Optional ordering with reinforcement layer of mica can be applied to both sides of the boards. Dust free surface.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions. ASEC Products is not directly neither indirectly responsible for any claim resulting from the use of any information provided in this datasheet.
