Categories: Calsium silicate fibre reinforced

ASPROMATECT is specially designed for ceiling, shaft and wall structures. A non-combustible, fiber-reinforced calcium silicate board. The board has a smooth surface and is very easy to finish.

Non-combustible (A1 according to EN13501-1). Light grey, non-combustible, high insulation value and long-term fire stability. Easy to process, beautiful surface. Also for use in curved constructions. Single-layer application for higher fire resistance.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions. ASEC Products is not directly neither indirectly responsible for any claim resulting from the use of any information provided in this datasheet.
