Categories: Calsium silicate mineral bonded

Mineral bonded, lightweight non-combustible steam-cured calsium silicate board with moisture resistant properties. Suitable for the fire-resistant protection of steel columns and beams and the realization of wall, shaft wall and ceiling constructions with a fire separating function, which must also meet certain requirements with regard to moisture resistance.

Non-combustible (A1 according to EN13501-1). Good insulating properties. Moistureproof. Resistant to parasites and rotting. Quick and easy to install.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions.
