Categories: Calsium silicate mineral bonded

Mineral bonded steam-hardened calcium silicate board with a low volumetric mass that is resistant to moisture. This plate is mainly used for the realization of fire resistant electro cable ducts, ventilation and smoke extraction ducts and ducts for fire resistant pressure relief systems. Suitable for a wide range of applications in indoor environments.

Non-combustible (A1 according to EN13501-1). Good insulating properties. Moistureproof. Resistant to parasites and rotting. Quick and easy to install.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions.
