FRICTION MATERIAL AB-3280

SKU: AB3280

ASEC Kunststoffen BV

Marketing 17, 6921 RE Duiven, The Netherlands

T: +31 316 84 44 01 | info@asec.nl

Categories: Organic moulded

Asbestos-free, rigid molded friction material based on graphite and phenolic resins as bonding system, containing short fibers, friction lubricants and fillers. Suitable for industrial applications, continuous brake, brake calipers, friction rings, brake pads, torque limiter. Recommended friction surface: pearlitic grey cast iron.

Resistance to oil. Medium low friction coefficient. Low wear. Silent operation.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions.
