Categories: Paper phenol

AI PF CP 206 Is a construction material for mechanical, electrotechnical and high-frequency purposes. Resistant to tropical conditions, where high humidity is expected. Suitable as high-frequency insulation thanks to low dielectric dissipation factor.

Stable electrical properties at high humidity. Suitable as a high-frequency insulation.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions. ASEC Products is not directly neither indirectly responsible for any claim resulting from the use of any information provided in this datasheet.
