CALOTESTER

SKU: CALOTESTER

ASEC Kunststoffen BV

Marketing 17, 6921 RE Duiven, The Netherlands

T: +31 316 84 44 01 | info@asec.nl

Categories: Tribodesign

Manufacturers and users of hard coatings are often confronted with the problem of the measurement of the thickness of coatings. AsecTribo has created a new and innovative instrument called CALOTESTER fully equipped with all items needed for measuring thickness of coatings, at your fingertips: programmed spherical abrasion controlled by microprocessor. Microscope for measurement of abraded coatings and a calculator to supply the results of thickness automatically.In accord with Standard: ISO EN-1071-2 and VDI 3198

Available in 2 basic versions and 2 advanced versions.Two instruments on one, suits both for laboratory samples and big industrial parts.For rapid thickness measurement of thin hard coatings.Expendable for higher precision of results and a more user-friendly interface.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions. ASEC Products is not directly neither indirectly responsible for any claim resulting from the use of any information provided in this datasheet.
