Categories: Plastic

The spherical ball, crafted from highly wear-resistant ASWPE1, pairs seamlessly with the housing, engineered from robust and shape-stable M163. Offering maintenance-free dry operation, it withstands dust and dirt, compensates for misalignment errors, and boasts absolute corrosion resistance. Remarkably lightweight, it facilitates effortless installation.

The information in this datasheet is provided for general purposes only and not meant to be a specific recommendation for any individual application. All values were determined under laboratory conditions.
